

**DEVELOPING THE LOCAL COMMUNITIES'S MANAGEMENT SKILLS
IN THE FIELD OF HEALTH RISKS**

Questionnaire for assessment

Madam, Sir,

The health risk management (problems of public health, environmental-linked health...) is a more and more priority concern for local communities.

The challenge of the emerging or remerging risks has to be taken up, but unfortunately no management scheme has grown on up to now.

Founded in 2005 as a joint initiative between the city of Lyon and the United Nations Institute for Training And Research (UNITAR), the International Centre for Local Actors Training (*Centre International de Formation des Acteurs Locaux de Lyon - CIFAL-Lyon*),' mission is to enhance management capacity in the field of public health at the international level. This association encourages all actions promoting the strengthening of the local actors' capacities and especially cities and local communities.

To ensure its mission, CIFAL-Lyon is supported by "United Cities and Local Governments" whose "Commission of Decentralised Cooperation" is chaired by Lyon.

In order to fulfil its goals, CIFAL-Lyon is willing to get your own assessment of your own needs of information/training. This questionnaire addresses all the aspects of the question in order to get a wide and global view on the situation.

Thank you to fill in this form and to send it back as soon as possible at contact@cifal-lyon.org or at:

CIFAL-Lyon
181, avenue Jean Jaurès
69007 Lyon
France

This questionnaire can be downloaded on www.cifal-lyon.org at « questionnaire d'évaluation ».
